Mototronik

Nova pogonska naprava s prednjim kolesom, ki v nekaj sekundah spremeni invalidski voziček v okretno in dinamično vozilo, ki je sposobno edinstvene vožnje. Odlikuje jo edinstven in prefinjen dizajn, hiter in intuitiven sistem za pritrditev na invalidski voziček, njegova kompaktnost in široko elektronsko programiranje neposredno iz naprave. Standardna konfiguracija vključuje naslednje elektronske funkcije: 5 stopenj hitrosti, vzvratna prestava, prilagodljivi tempomat, elektronska zavora s pritiskom na gumb (EBS), motorna zavora in sistem za rekuperacijo energije.

Mototronik

A new power assist front-wheel drive device that, in a few seconds, transforms the wheelchair into an agile and dynamic vehicle capable of transmitting a unique driving emotion. It is characterized by its unique and refined design, for the quick and intuitive wheelchair attachment system, for its compactness and for the wide electronic programming directly from the device. The standard configuration includes the following electronic features: 5 speed levels, reverse gear, adaptive cruise control, push-button electronic brake (EBS), motor brake and energy recovery system.

Technical data

Kolo 12" 250W z največjo močjo 750W

Kolo 14" 1000 W z največjo močjo 1500 W

Wheel 12" 250W with 750W peak or

Wheel 14" 1000W with 1500W peak

Baterija STD 48V 5,8 Ah - vožnja do 25 km oz.

Baterija 48V 11,6 Ah - vožnja do 50 km

Battery STD 48V 5.8 AH - autonomy up to 25 km or

Battery 48V 11.6 AH - autonomy up to 50 km

Okvir vilic z ovalnim prerezom iz aluminijeve zlitine 7020 zagotavlja odpornost in zanesljivost.

Aluminium alloy 7020 oval section fork frame to grant resistance and reliability.

CNC strojno izdelana podpora za kolesa in kolutne zavore.

CNC machine made wheel and disk brake support.

Spojler z LED lučjo.

Spoiler with Full Led headlight provision.

Blatnik.

Mudguard.

Odstranljivo stojalo.

Removable stand.

1.

Različica z 12-palčnim pogonskim kolesom z največjo močjo 750 W in tetra (kvadriplegičnim) krmilom.

Version with 12" drive wheel with 750 W maximum power peak and Tetra (quadriplegic) handlebar.

2.

Različica s 14-palčnim pogonskim kolesom z največjo močjo 1000 W in standardnim krmilom.

Version with 14" drive wheel with 1000 W maximum power peak and standard handlebar.

3.

Barvni zaslon; 5 stopenj hitrosti in vzvratna prestava; Raven baterije in avtonomija; Skupna razdalja in razdalja potovanja; Moč; Signal za polnjenje baterije; Prižgan žaromet; Aktivacija vrat USB.

Colour display; 5 speed levels and rear gear; Battery level and autonomy; Total and trip distance; Delivered power; Battery recharge signal; Head light on; USB port activation.

4.

Programiranje z zaslona; 10 stopenj elektronske jakosti zaviranja; 10 stopenj pospeška; 10 stopenj intenzivnosti zaviranja motorja; Hitrost vzvratne prestave; Največja hitrost (v mejah zakonodaje); Ponastavitev potovanja; km/h ali mph.

Programming from the display; 10 levels of electronic brake intensity; 10 acceleration levels; 10 levels of motor brake intensity; Rear gear speed; Maximum speed (within limits of law); Trip reset; Km/h or MPH.

5.

Spojler (standard) z LED žarometi (opcijsko).

Spoiler (standard) with Full LED headlight (optional).

6.

Zaporedje montaže/demontaže.

Mounting /detaching sequence.
